

GOKULAKRISHNAN S

+91 9345789315 | gokulakrish9345@gmail.com | linkedin.com/in/gokulakrishnan-sivakumar | github.com/iamgokul1234

PROFESSIONAL SUMMARY

Results-driven Full Stack Developer with 1+ year of experience building scalable, production-grade web applications using React.js, TypeScript, Node.js, Express.js, and AWS. Proven track record delivering serverless REST APIs, MERN stack applications, AI API integrations (Groq Llama 3, Google Gemini), and CI/CD pipelines. Skilled in Redux Toolkit, JWT authentication, MongoDB, DynamoDB, and Agile development with a strong focus on performance optimization, clean code, and end-to-end ownership.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), TypeScript, HTML5, CSS3, SQL

Frontend: React.js, React 19, Redux Toolkit, React Router DOM, Vite, Bootstrap, Ant Design, Axios, Recharts

Backend: Node.js, Express.js, REST API Design, JWT Authentication, bcrypt, Nodemailer, Multer, Helmet, Microservices

Databases: MongoDB Atlas, AWS DynamoDB, MySQL

Cloud & DevOps: AWS Lambda, Vercel, Render, Cloudinary CDN, GitHub Actions, CI/CD Pipelines

AI & Payments: Groq (Llama 3), Google Gemini API, Razorpay Payment Gateway, Real-Time Streaming

Tools: Git, GitHub, Postman, Jira, Kibana, Agile/Scrum, Performance Optimization

PROFESSIONAL EXPERIENCE

Full Stack Developer — Tenext Technologies

April 2025 – June 2026

- Developed and deployed 10+ serverless REST APIs using AWS Lambda, Node.js, and Express.js, improving API response times by ~35% and reducing infrastructure costs in production.
- Built responsive React.js/TypeScript applications with Redux Toolkit for centralized state management, enabling seamless frontend-backend integration across multiple product modules.
- Designed and optimized AWS DynamoDB schemas for high-read workloads, reducing data retrieval latency; monitored system performance via Kibana dashboards.
- Integrated Google Gemini and Groq (Llama 3) APIs to power context-aware AI chat features with session management, dynamic history retrieval, and real-time message streaming.
- Maintained clean Git branching workflows, peer code reviews, and Jira-based Agile sprint planning across cross-functional teams.

PROJECTS

ShopNest Pro — Full-Stack E-Commerce Platform

shopnest-pro-seven.vercel.app | github.com/iamgokul1234/shopnest-pro

Stack: React 19, Node.js, Express.js, MongoDB Atlas, Redux Toolkit, Razorpay, Cloudinary, JWT, Nodemailer, GitHub Actions, Vercel, Render

- Architected a production e-commerce platform across 15 development phases with 32 RESTful API endpoints spanning 10 resource types, fully deployed to Vercel and Render.
- Implemented JWT authentication, bcrypt hashing, role-based access control (User/Admin), and Axios interceptors for automatic token management and 401 redirect handling.
- Integrated Razorpay with HMAC SHA256 signature verification; built full order lifecycle (Checkout → Payment → Shipped → Delivered) supporting online and Cash on Delivery flows with automated email notifications.
- Architected Redux Toolkit global state (3 slices: auth, cart, wishlist) with cross-device cart persistence; built admin analytics dashboard with Recharts (revenue charts, order KPIs) and Cloudinary CDN image management.

AI Interview Assistant — Full-Stack MERN Application

github.com/iamgokul1234

Stack: React.js, TypeScript, Node.js, Express.js, MongoDB Atlas, Redux Toolkit, Groq AI (Llama 3), JWT, GitHub Actions, Vercel, Render

- Built a production AI interview prep platform with JWT authentication, persistent multi-session chat, and context-aware responses via Groq Llama 3 with last-10-message history per request.
- Designed RESTful API with layered architecture (Routes → Controllers → Services → Models), full CRUD for users/conversations/messages, JWT-protected routes, and CI/CD via GitHub Actions.

EDUCATION

B.E. — Electronics and Communication Engineering | KPR Institute of Engineering and Technology

2020 – 2024

CERTIFICATIONS

- MERN Stack Development — KGISL Institute of Technology (February 2026)
- Data Science and Machine Learning with Python — L&T EduTech (January 2023)
